MUHAMMAD YOGI

Backend / Full-Stack Engineer | Fintech & Healthcare | Node.js · NestJS · PHP/Laravel · Go · Python · AWS
Pekanbaru, Indonesia (UTC+7) • Email • WhatsApp • LinkedIn • GitHub • GitLab • LeetCode • Portfolio

SUMMARY

Backend / Full-Stack Engineer with 4+ years building production systems that move money: 150+ APIs and 50+ system integrations across fintech and healthcare. Backend engineer for 10+ financial service projects on AWS Serverless (Node.js/NestJS, PHP/Laravel), typically delivered in about half the planned time. Led a Lambda-to-NestJS platform migration and made healthcare reporting 700% faster. Open to full-time roles, international remote work, and consulting.

EXPERIENCE

PT 360 TEKNOLOGI INDONESIA · Client: Indogrosir — **JAKARTA, ID (REMOTE)**
Backend Software Engineer | Full-time — **Jun 2023 – Present**

- Owned 10+ financial service projects end to end, typically shipped in about half the planned time
- Engineered 100+ production REST APIs in Node.js/TypeScript on AWS Lambda, SQS, SNS, and S3
- Architected event-driven payment systems on AWS Serverless with RabbitMQ for high throughput
- Integrated 40+ banks and partners with zero missed deadlines (OAuth 2.0, HMAC, JWT, AES-256)
- Led migration of 3 Lambda projects into one NestJS platform: 50+ APIs rebuilt, OpenTelemetry added
- Built the settlement pipeline: API Gateway, Lambda, PostgreSQL, bank APIs, S3, and MFT file exchange
- Built 2 internal platforms from scratch (Laravel, React), incl. a payment integration platform
- Refactored 10+ legacy services to clean architecture, improving testability and reliability
- Backed services with Jest/Supertest tests, k6 load tests, and Prometheus/Grafana monitoring

PT TEKNOLOGI MEDIA MEDIKA (ASSIST.ID) — **PEKANBARU, ID (ON-SITE)**
Backend Software Engineer | Full-time — **Jul 2022 – Apr 2023**

- Made reporting 700% faster by rewriting MongoDB aggregation pipelines with materialized views
- Built 50+ REST APIs for the AUDY healthcare platform (Node.js, LoopBack, Express.js, MongoDB)
- Automated cleanup of 10,000+ appointment records with zero data loss, removing manual work
- Integrated 10+ third-party services (insurance, notifications); resolved 30+ production issues
- Refactored legacy backend modules, improving maintainability and deployment reliability

SKILLS

Languages : TypeScript/JavaScript, PHP, Go (Golang), Python
Backend : Node.js, NestJS, Express.js, Laravel, LoopBack, Lambda Function
DevOps/Cloud : AWS (Lambda, SQS, SNS, API Gateway, S3, ECR), Serverless, Docker, Kubernetes, CI/CD
Databases : PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, query optimization, schema design
Messaging : RabbitMQ, WebSocket, webhooks, MFT file exchange
Architecture : REST API design, microservices, event-driven, clean architecture, distributed systems
Security : OAuth 2.0, JWT (RS256), HMAC-SHA256, RSA, AES-256-GCM
Testing : Jest, Supertest, k6, OpenTelemetry, Prometheus & Grafana, Swagger/OpenAPI
Tools : Git, Postman, CloudWatch, AI-assisted development
Frontend : React, Inertia.js, Tailwind CSS, Material UI

EDUCATION

UNIVERSITAS LANCANG KUNING — **PEKANBARU, ID**
Bachelor of Computer Science, Informatics Engineering — **2017 – 2021**
EDUWORK — **YOGYAKARTA, ID**
Full-Stack Web Development Bootcamp (MERN, REST APIs) — **Jan 2022 – Jul 2022**

PROJECTS

- **Enterprise case studies (NDA)**: NestJS migration, serverless payments, operations platform — Portfolio
- **Rakit (NestJS, React)**: e-bike store, 3D configurator, oversell-safe checkout — Live demo · GitHub
- **Webhook Relay (Go)**: idempotent payment webhooks, HMAC, retries, dead-letter — GitHub
- **Problem solving**: 200+ algorithm challenges on LeetCode, HackerRank, and Codeforces — LeetCode
